As a Vocational High School graduate with a strong passion for Information Technology. Equipped with the skills gained from completing the Front-End Bootcamp at Dibimbing.id. I also gained practical experience as a Frontend engineer Intern at jubeli, where I contributed to developing and maintaining user interfaces for web applications. This role allowed me to work closely with senior developers, enhancing my skills in component-based architecture and state management while applying best practices in code efficiency and user experience design.

## Skills

### Hard Skill

- Responsive Web Design
- React JS
- Bootstrap 5
- Vue JS
- Next Js
- Typescript

### Soft Skill

- Problem Solving

## Projects

### Crud Vue

Implemented CRUD using Vue js integrated with Backend API. Some of the frameworks that I use are framework bootstrap 5 and router.

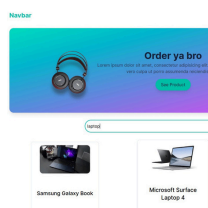

<https://github.com/raisayaf20/crud-vue>

### Food Journal

Deploy React JS to complex websites with integration via a REST API backend. Tools used: React Hook Form, React-Router, Axios, React-Select, and using the Bootstrap.

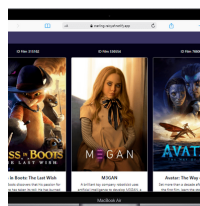

<https://github.com/raisayaf20/food-journal>

### API Product

Implemented Next js And Tailwind CSS in a Website Api Product with DummyJson's REST API integration. This website also has a Search feature.

<https://github.com/raisayaf20/try-next13>

### API Movie

Implemented React js to create a movie website. This movie website displays movies retrieved via the Rest API from the movie database. The tools used are react-bootstrap, Axios, Formik.
